

Body Systems Choice Project

Choose one of the following projects to complete to show your knowledge on body systems.

<p>Create a Model</p> <p>Create a model of a body system of your choice using materials of your choice. (ex. Pasta noodles, q-tips, candy, yarn, play-doh, etc.) Label the major parts of your model.</p>	<p>Teamwork</p> <p>Describe how two different body systems work together to help keep you alive and healthy.</p> <p>-Stay organized with your information/research.</p>	<p>Create a Game</p> <p>Create a game about the body system of your choice. Make sure to include important vocabulary, facts, etc. The game should include rules, materials for play, question cards, and answers.</p>
<p>Design a Brochure</p> <p>Create and design a brochure about the body system of your choice. Include facts and functions of the system, important vocabulary, and ways to keep it healthy.</p>	<p>Student Choice</p> <p>Complete a project of your choice to share your learning on a body system.</p> 	<p>Timeline</p> <p>Create a timeline of a body system in action. Write 5 events in order showing the process of how that body system works.</p>
<p>Talk Show</p> <p>Write down 10 questions you would like to ask a doctor about a body system. What would you like to learn more about?</p> 	<p>Design an Exercise Routine</p> <p>Create an exercise routine that works out all of the major muscles of the body. Write out a script of your routine, identifying what muscles are used. Send your workout video to your teacher.</p>	<p>Research</p> <p>Research either the skeletal system, circulatory system, or muscular system of an animal. Create a Venn Diagram comparing the similarities and differences to that human body system. Write a four-paragraph paper about your findings.</p>
