

Virtual BioLab fieldtrip

Since our fieldtrip to the St. Boniface Research Centre Youth BioLab was cancelled, Stephen from the BioLab made a video similar to what we would have learned about on our field trip. He talks about the research centre and how scientists use cells to try to cure diseases. He also talks about the heart and does a demonstration of a heart dissection. Click this link to watch the video:

<https://youtu.be/4CPZpuMAeZs>

After watching the video, send an email to your teacher. In this email, tell her what you thought of the dissection. Please also list a few things that you learned about the heart and circulatory system by watching this video.

Heart Dissection
